

★ **BIG-POWER** ★

*Breathing
means living*

WANT TO SOLVE AIR POLLUTION IN YOUR HOME... ONCE AND FOR ALL?

It's as easy as winking thanks to BIG POWER, the multi-functional household appliance with a water filtration system which cleans all domestic surfaces and eliminates indoor pollution. It removes dirt, dust and liquids without having to replace filters or bags. It's exclusive working principle is also efficient against germs and mites which are the most common cause of allergies and other breathing diseases. The BIG POWER can pick up dirt and clean the air at the same time. Its special water filtering system, together with the use of Hepa filters, enables the capture of 99.99% of pollutants while it refreshes the air and eliminates allergens, dust mites and respiratory irritants.

The laboratory tests performed by the most authoritative Italian and Foreign Institutes confirm BIG POWER's potentials and its effectiveness in the purification and sanitizing of the domestic environment, improving in this way the quality of our lives. In fact, if we use a traditional vacuum cleaner, a big part of the inhaled dust returns to the air together with mites and mold contained in the bag of the device, whereas with BIG POWER **the inhaled dust remains in the appliance and only clean and purified air comes out.**

This patented system of air washing allows healthy breathing and it is for this reason that BIG POWER is so

ADVANTAGES THAT YOU CAN CLEARLY SEE!

- cleaner air
- mattresses free from mites
- less dust
- less hard work
- minor costs
- hygiene & health
- thorough cleanliness
- constant suction
- ionization of the air
- ...and much much more!
